SHP SOLUTION
Smart Solutions, Smarter Decisions.

EXECUTIVE SUMMARY

SHP Solution, established in 2012, is a technology-driven company specializing in Geographic Information Systems (GIS) technology and location intelligence. With its flagship product, Geolytix, and a suite of customized GIS solutions, SHP Solution enables businesses to harness geospatial data for smarter decision-making and enhanced operational efficiency. The company has a strong track record of delivering innovative solutions for both government and corporate sectors, empowering industries with cutting-edge geospatial analytics.

ABOUT US

SHP Solution stands at the forefront of geospatial technology, offering advanced GIS solutions to enhance business operations. As the creator of Geolytix, a dynamic GIS-based platform, SHP Solution provides businesses with actionable insights into their spatial data, facilitating data-driven decision-making. The company's solutions address real-world challenges across multiple industries, including government, infrastructure, utilities, and telecom. Through its commitment to innovation, SHP Solution continues to revolutionize the way organizations leverage location intelligence to drive efficiency and growth.

VISION

To be a global leader in GIS consulting and IT solutions, empowering government and corporate sectors with innovative, scalable technology to achieve operational excellence.

MISSION

We strive to enhance business operations through customized GIS-based decision support systems by:

- **Developing high-quality GIS software solutions.**
- **Improving data access and security, especially for the government sector.**
- **Optimizing data validation and migration processes.**
- **Delivering cost-effective and value-driven IT solutions.**

OUR SERVICES

Comprehensive Geospatial Consulting & Technology Solutions

Geolytix Platform – Geospatial Analytics Solution

A robust platform for field data collection, visualization, analysis, and optimization of spatial data for strategic business insights.

Custom GIS Solutions

Bespoke GIS solutions for mapping, asset tracking, and spatial data management.

GIS Training & Support

Specialized training programs and ongoing technical support to enhance GIS adoption and proficiency.

Geospatial Consulting Services

Expert guidance on integrating geospatial data into business operations for improved efficiency.

Data Analytics & Reporting

Advanced geospatial data analysis and interactive reporting to drive informed decision-making.

OUR SOLUTIONS

- **Water Quality and Quantity Measurement Systems**
- **Complaint Redressal**
- **Asset Maintenance Management System**
- **Project Monitoring System**
- **Asset Tracking System**
- **Encroachment Monitoring System**

INDUSTRIES WE SERVE

SHP Solution offers GIS-based services across diverse industries, delivering customized solutions to meet unique business requirements.

KEY PROJECTS & ACHIEVEMENTS

1 **Telecom Network Asset Management System - RailTel**

Developed a GIS-based asset and network management system to efficiently oversee RailTel's telecom infrastructure across India.

2 **Project Monitoring System (PMS) - The Indian Army**

Designed and implemented a GIS-driven project tracking system to monitor and streamline progress at various stages.

3 **Signaling Maintenance Management System (SMMS) - Northern Railway**

Created a GIS-based maintenance system to enhance asset health monitoring and minimize failures.

4 **Fiber Asset Management System - APSFL**

Delivered a GIS-powered fiber asset monitoring solution for effective telecom network operations and maintenance.

5 **Water Distribution Network Survey & GIS Management - Jal Pradhikaran (Ansh Infra Developer)**

Executed a 2,000 km water distribution network survey, asset inventory, project management, and GIS visualization in Aurangabad.

6 **Property Data Migration & Billing System Optimization - Vadodara Municipal Corporation**

Migrated 1.05 million property records, optimized property assessment workflows, and re-engineered the billing system with SCADA integration for enhanced efficiency.

WHY US?

GIS & IT Expertise:

Over 10 years of industry experience delivering cutting-edge solutions.

Customized Solutions:

Tailor-made software and data-driven decision support systems.

Proven Track Record:

Successful execution of high-profile, complex projects.

24/7 Support:

Continuous maintenance for system reliability and peak performance.

What makes us unique?

Tailored Industry Solutions: Specialized GIS services for government, utilities, telecom, energy, oil & gas, defense, and smart cities.

Enhanced Efficiency & Cost Savings: Reduces field efforts by 85%, eliminates paper-based workflows, and accelerates data processing.

Intuitive & Scalable: User-friendly platforms designed for seamless adoption with minimal training.

Secure & Future-Ready: Cloud-based, centralized solutions ensuring lifetime data security and accessibility.

Proven Success: A strong track record of delivering impactful projects across defense, railways, utilities, and smart cities.

Company History & Milestones

2018 - Recognized key market gaps in data capture and business intelligence.

2019 - Introduced a service-based solution tailored for Indian government clients.

2020 - Expanded into product development, addressing industry-specific challenges.

2022 - Launched a GIS-based analytics platform.

2023 - Upgraded the platform with advanced features, gaining market recognition.

2024 - Secured the first government contract for product deployment.

2025 - Registered the product as Geolytix, driving global adoption.

OUR CLIENTELE

SHP Solution has provided services to both domestic and international clients, including organizations in Canada and Bahrain. Our experience includes collaborations with the Indian Defense, Indian Railways, BharatNet, and multiple state governments.

LET'S WORK TOGETHER

At SHP Solution, we are dedicated to advancing innovation through geospatial intelligence. Whether you need a custom GIS solution, advanced data analytics, or cutting-edge location intelligence, our expertise ensures tailored solutions that align with your business needs.

With Geolytix leading our technology offerings, we empower organizations to make smarter, data-driven decisions.

Let's work together to transform your operations with powerful GIS technology.
